1. What is the difference between CSS flexbox and grid? Analyze which layout technique is more suitable for designing a photo gallery and justify your answer.

Web Development Essentials

- Home work - CSS -

1. Answer:

- Here the difference between CSS Flexbox and CSS Grid-

CSS Flexbox	CSS Grid
(i) One-dimensional layout system.	(i) Two-dimensional layout system.
(ii) Works in One direction (row/column)	(ii) Works in both rows and columns together.
(iii) Best for small layouts like navigation bars, buttons, menus.	(iii) Best for large page layouts and image galleries.
(iv) Easier to align items in single line.	(iv) Easier to arrange items in rows and columns.
(v) Less control over both directions at the same time.	(v) Full control over both horizontal and vertical alignment.

- CSS Grid is more suitable for designing a photo gallery. Because, A photo gallery contains multiple images arranged in rows and columns. CSS grid makes it easy to create equal-sized image boxes and provides better alignment and spacing between image.

2. A company wants to design a responsive navigation bar for its website. Create the HTML and CSS code to meet the following requirements:

- The navigation bar background should be dark blue.
- The menu items (Home, About, Services, Contact) should be white.
- The menu items should be displayed horizontally using CSS Flexbox.
- When the user hovers over a menu item, its background color should change to black

2. Answer: Here the HTML & CSS code -

```
.html:
<!DOCTYPE html>
<html>
<head>
  <title>Navigation Style
  </title>
  <link rel="stylesheet"
        href="style.css">
</head>
<body>
<div>
  <ul>
    <li><a href="#">
      Home </a></li>
    <li><a href="#">
      About</a></li>
    <li><a href="#">
      Services</a></li>
    <li><a href="#">
      Contact</a></li>
  </ul>
</div>
</body>
</html>
```

```
.css:
* {
  margin: 0;
  padding: 0;
  box-sizing: border-box;
}
div {
  background-color: darkblue;
}
div ul {
  list-style: none;
  display: flex;
  justify-content: center;
  flex-wrap: wrap;
}
div ul li a {
  display: block;
  color: white;
  text-decoration: none;
  padding: 15px 25px;
}
div ul li a :hover {
  background-color: black;
}
@media screen and (min-width: 600px) {
  div ul {
    flex-direction: column;
    align-items: center;
  }
  div ul li {
    width: 100%;
  }
  text-align: center;
}
```
